1.First we clone the project repository buy using git plugin

☐ None

☒ Git ?

Repositories ?

Repository URL ?

https://github.com/gaikwad-21/project.git

Failed to connect to repository : Error performing git command: ls-remote -h https://github.com/gaikwad-21/project.git HEAD

Credentials ?

- none -

+ Add

Advanced ▾

+ Add Repository

2. Second we configure the Maven Build tool in our job

Name

Apache-Maven

☒ Install automatically ?

Install from Apache

Version

3.9.16

Extract *.zip/*.tar.gz ?

Download URL for binary archive ?

<https://dlcdn.apache.org/maven/maven-3/3.9.16/binaries/apache-maven-3.9.16-bin.zip>

Subdirectory of extracted archive ?

/mnt/build-tool

3. Third we will remove maven local repository and build the project using

```
rm -rf /root/.m2/repository
```

Advanced ▾

Invoke top-level Maven targets ?

Maven Version

Apache-Maven

Goals

clean install

4. we will copy the war file generated during the build to the Apache Tomcat webapp Folder

Execute shell ?

Command

See [the list of available environment variables](#)

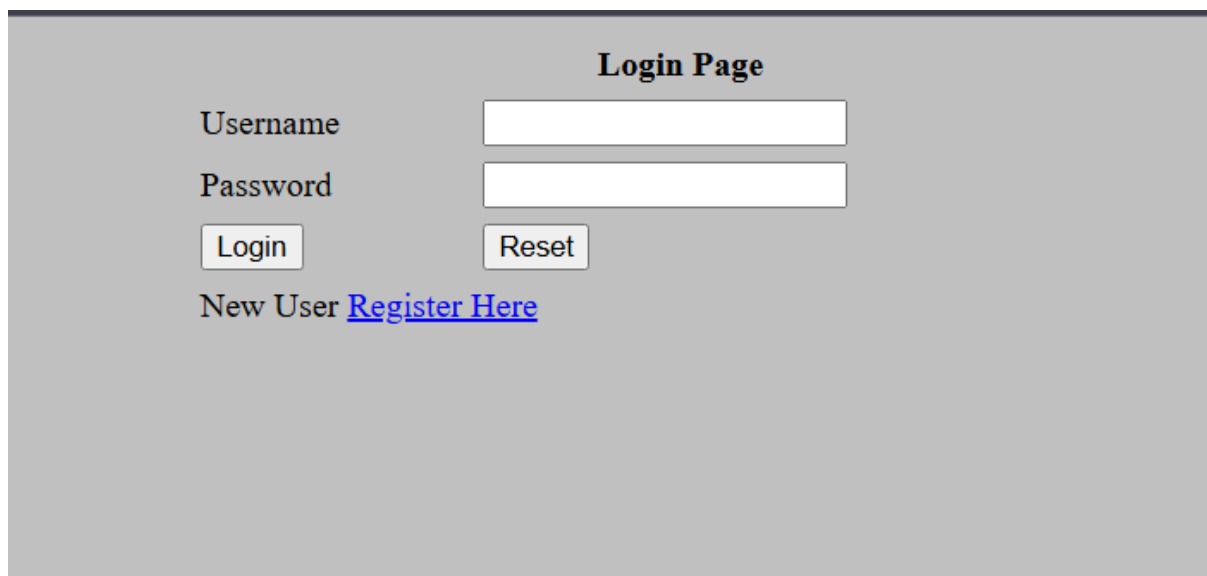

```
cp -r /mnt/Assi-5/target/LoginWebApp.war /mnt/server/apache-tomcat-10.1.59/webapps
```

```

6. Project Output

The screenshot shows a web browser window displaying a login page. The page has a light gray background. At the top center, the title "Login Page" is displayed in a bold, black font. Below the title, there are two input fields: "Username" and "Password". The "Username" field is on the left, and the "Password" field is on the right. Both fields are white with a thin black border. Below the "Username" field, there is a "Login" button with a black border. To the right of the "Login" button, there is a "Reset" button with a black border. Below the "Login" button, there is a link "New User [Register Here](#)" in blue text.
